Pharmaceutical Consulting Firm Celebrates Five Year Anniversary

PHILADELPHIA, PENNSYLVANIA, May 14, 2009 – Compliance Implementation Services (CIS) reaches a milestone by celebrating its 5 year anniversary as a Pharmaceutical Compliance Consulting firm.

Started by two industry experts, CIS was founded with the goal of providing pharmaceutical companies with compliance expertise for their Clinical and Commercial needs, exceeding expectations and providing quality deliverables. Through the years, CIS has experienced solid growth and acknowledges this as a great achievement considering the economic factors facing businesses today.

“In a year where CIS expands with the opening of our North Carolina headquarters and passing the 5 year mark, we are extremely proud of what our company has accomplished.” states Co-Founder and Vice President of Operations, Jim Collins, “through the hard work of our talented consultants, we have been able to strengthen and expand our business to continually offer new products and services and to establish the CIS brand within the pharmaceutical community.”

CIS currently provides compliance consulting to over 65 pharmaceutical clients, which range from small to large tier companies. With over 60 employees, compliance services expanding deeper in the clinical and commercial arenas and the internal development of products such as CalcPartner, ClaimsPartner and the Pharma Compliance Exchange (PCX), this number is expected to continue to grow.

CIS Co-Founder and Vice President of Account Management, Toni Barsh added “I attribute our growth to our dedicated employees. We realize and appreciate that their commitment to the CIS vision we created 5 years ago has made our company and business culture into the success it is today. I am extremely proud of the quality of our consultants and the work product we produce given our challenging compliance environment. Our clients are outstanding partners in reaching a goal of establishing a culture of compliance.”

About CIS:

Compliance Implementation Services (CIS) is a consulting firm specializing in compliance strategies for pharmaceutical companies, from Global Clinical Research & Development through U.S. Commercial Compliance. Founded in 2004 by industry experts, our deep understanding of industry laws and regulations, innovative and practical applications, and fit-for-purpose solutions help our clients establish a “Culture of Compliance.”

Our expertise allows us to understand and specialize in interpreting and implementing legal and regulatory requirements that have the greatest impact on research, development and commercial activities, so you can proactively identify and integrate appropriate compliance strategies. Taking a collaborative approach ensures we fully understand you and your vision.
